TRADEMARK

Registration

Ministry of Economy is the competent authority to register trademarks in the UAE.

Registration documents include:

Trademark logo

A copy of the commercial licence

Power of Attorney

Priority document

Passport copy

Other attachments.

A trademark is any distinguished form of names, words, signatures, letters, figures, graphics, logos, titles, hallmarks, seals, pictures, patterns, announcements, packs or any other marks or group of marks, if they were used or intended to be used either to distinguish goods, products or services from whatever sources, or to indicate that certain services, goods or products belong to the owner of the trademark, because of their provision, manufacturing, selection or trading. The voice accompanying a trademark is considered a part of it.

TRADEMARK

Benefits of Trademark/Brand Registration

The benefits are huge for registered trademarks than the unregistered trademarks. Many companies mistakenly believe that registration of their Company name with DED/Municipality offers protection to their trademark. In fact, such registration with DED/Municipality is not related to trademark registration and does not provide any trademark protection for the company name. The Trademark Registration in UAE will protect your Brand name in all the Seven Emirates in UAE. In cases of expansion of business or transfer of business or any potential infringement/passing off claims, the registration of trademark comes in handy..

COPYRIGHT

Copyright is a form of intellectual property that grants the creator of an original creative work an exclusive legal right to determine whether and under what conditions this original work may be copied and used by others, usually for a limited term of years.

Duration of protection

According to Article 20 of Federal Law No. 7 of 2002 on Copyrights and related rights, the economic rights of the author under this Law shall be protected for the duration of his life plus 50 years starting from the first day of the calendar year following his death. Economic rights of applied art works expires after 25 years, which start from the first day of the calendar year following their first publication.

COPYRIGHT

The following intellectual works are protected under copyrights law:

- Photographic work and the likes
- Works of applied art and plastic art
- Charts, maps, plans, 3-D modelling for geographical and topographical applications and architectural designs etc.

- Books, booklets, articles and other literature.
- Computer software and applications, databases and similar works defined in a decision to be issued by the Minister of Economy
- Lectures, speeches, sermons and other works of similar nature Plays, musicals and pantomimes.
- Musicals accompanied by dialogues and musicals which are not accompanied by dialogue
- Audio and video works or audio-visual works
- Architectural work and architectural plans and drawings
- Drawings, paintings, sculptures, etchings, lithography, screen printing, reliefs and intaglio prints and other similar works of fine art
- Derivative works, subject to the protection afforded to the work(s) upon which they are based. The protection shall extend to the title of the work, if created, as well as the creative concept devised for broadcast material.

PATENT

Registration of patents

There are essentially two routes for patent protection in the UAE, a national route and a regional route. The national route requires filing a national application at the UAE Patent Office. The regional route requires filing a GCC patent application, which once granted, would in principle cover protection in the six GCC countries.

A patent protection in the UAE is granted for any new invention resulting from an innovative idea or innovative improvement of an invention in all fields of technology, provided that such an idea or innovative improvement has a scientific basis and is applicable. The invention shall be deemed industrially applicable in its broadest term if used or utilised in such fields as agriculture, fisheries, handicrafts and services. Examples of patents that are not protected include:

- Researches, plant and animal species, and biological methods for production of animal and plant excluding microbiological methods and their products
- Diagnostic methods, treatments and surgical operations needed for humans and animals
- Scientific and mathematical principles, discoveries and methods
- Guidelines, rules or methods followed to conduct business, perform mental activities or play games
- Invention that may lead to violation of public order or morals.

INDUSTRIAL DESIGN

Registration Procedure

- Filing an Application before the Patent Office to qualify for protection under the law.
- The design is examined and is subject to approval.
- Accepted application(s) then get published in the Official Gazette office, and the absence of any objection is successfully registered.

Industrial design right is a form of intellectual property right. These rights protect the visual design of objects. An industrial design consists of the creation of a shape, configuration or composition of pattern or color, containing aesthetic value. The United Arab Emirates Patent and Design Law (Federal Law number 44 of 1992) initially provided for registration of industrial designs. The term of protection is ten (10) years from the filing date. The owner of an industrial drawing and design certificate can prevent any other party from undertaking the following activities:

- Use of the industrial drawing, design, or model for manufacturing any product;
- Importation or acquisition of any merchandise relating to the drawing, design, or model with the intention of using or selling that product.

Registration Procedure

- Filing an Application before the Patent Office to qualify for protection under the law.
- The design is examined and is subject to approval.
- Accepted application(s) then get published in the Official Gazette office, and the absence of any objection is successfully registered.

BUSINESS INCORPORATION

FREEZONE

OFFSHORE

MAINLAND

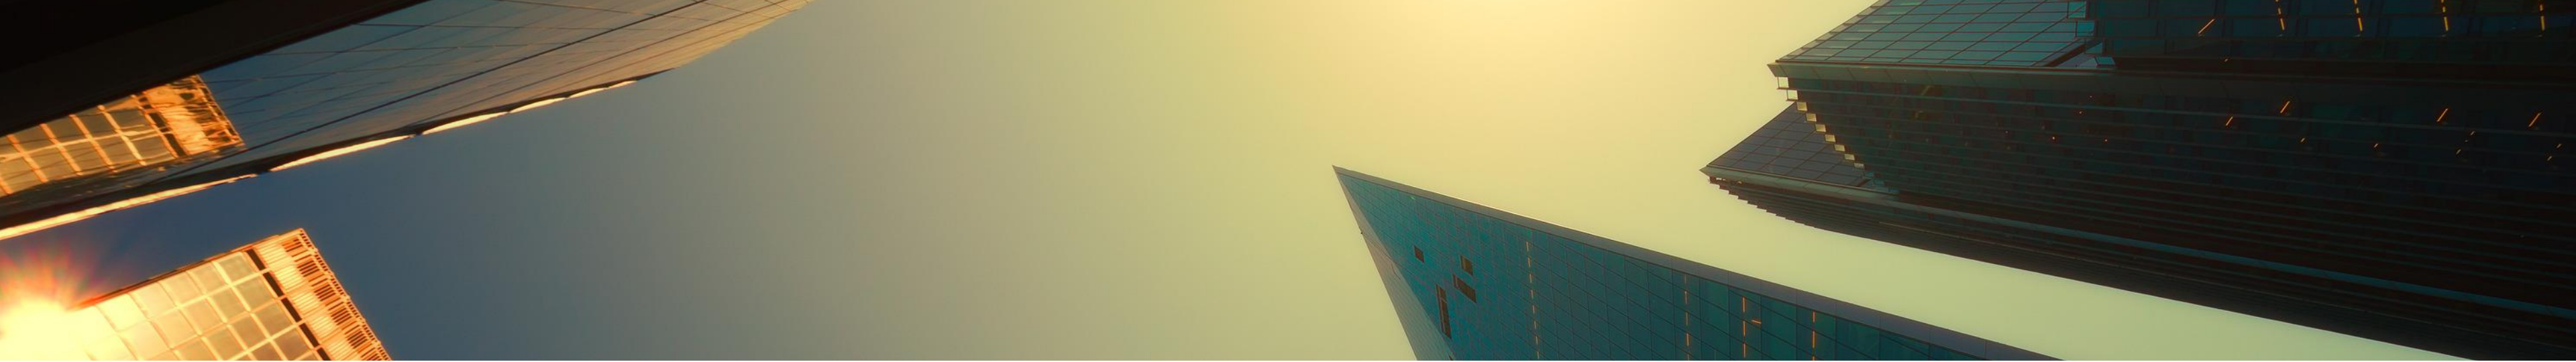

MAINLAND

A UAE national is required for Mainland company setup in UAE who is known as local sponsor or local service agent. A local sponsor is necessary for commercial companies where he will hold maximum number of share, that is 51% and expatriate will hold only 49% shares. Local service agent is also needed for professional company setup, in which an expatriate is permitted to hold 100% shares in mainland company setup in UAE. We can provide you a local sponsor and you'd have full power to do business in your own unique style. The sponsors will not be involved in profit sharing or any of your business operations.

FREEZONE

A Free Zone enterprise is a physical entity established in any one of the many Free Zones spread across the UAE. Envisioned to ease the company formation process within its premises, the Free Zones have laws and facilities separate from the rest of the UAE that ensure that they remain investor-friendly in spite of their varying stipulations and regulations. Free Zones in the UAE offer 100% foreign ownership rights for the investor and permit full repatriation of capital and profits.

OFFSHORE

Offshore company setup is perfect choice for the companies that do not plan to conduct business in the UAE, yet need a UAE address. Offshore businesses are allowed to bank with national banks and hold investments within and outside the UAE. An offshore company allows investors to take advantage of the UAE's zero-tax laws and double taxation treaties. Unlike a Free Zone company, there is no minimum capital. A few other advantages of offshore companies include complete privacy, 100% foreign ownership, the ability to open multiple currency bank accounts, and the allowance for real estate investments.

PRO Services in UAE play an important role when our clients want passport clearance, immigration, business licenses, trademarks, copyrights and certification.
